PROFILE

Results-driven Technical Product Manager with a passion for driving user acquisition, engagement, and revenue growth. Proven ability to leverage data analytics, A/B testing, and agile methodologies to identify and capitalize on growth opportunities. Skilled in translating business objectives into actionable technical requirements and leading cross-functional teams to deliver scalable, high-impact products.

EDUCATION

Bachelor's degree, in communication and computer Engineering - Helwan University 2017 – 2022

PROFESSIONAL EXPERIENCE

AI Technical Product Manger 12/2024 – present
ILLA Trucking for Logistics Solutions Cairo, Egypt

- **Technical Leadership:** Manage cross-functional teams to deliver AI-driven logistics solutions, translating business needs into technical specs, API requirements, and JIRA tickets.
- **Rapid Prototyping (Low-Code/AI):** Build and launch high-fidelity MVPs using **low-code tools (Cursor, Lovable)** and **prompt engineering** to validate usability and product-market fit.
- **Vibe code** software solutions with different purposes to solve business problems using **Claude Code, Codex, Cursor**.
- **Hosted** a lot of AI agents on **VPS** hostinger to help in our workflow like managing Jira board and track the developers Progress using their commit history on github.
- **Quality & Documentation:** Own the end-to-end **QA/testing** process and technical documentation for pilot releases, ensuring high performance and scalable AI automation.

AI Product Manager - Part time 10/2025 – Present
Navona.AI Remote

- **Process Optimization:** Scaled team productivity by implementing structured workflows and a "quick-win" strategy for a cart abandonment platform.
- **Backlog Management:** Spearheaded technical requirement gathering and ticket writing to bridge the gap between business goals and engineering execution.

Software Quality Assurance Engineer 04/2024 – 12/2024
ILLA Trucking for Logistics Solutions Cairo, Egypt

I had the opportunity to act as a quality assurance engineer in a product based company and exploring new digital solutions for software testing such as experiencing new techniques to automate test cases, exploring how would it impact our product by creating defect analysis report.

Software Tester 01/2024 – present
WebOps Software House Cairo, Egypt

Now I'm responsible for full functionality tests, API automation tests for massive projects, handling SRS, and I'm working individually so I gained alot of experience.

Customer Service Representative 06/2022 – 01/2023
Teleperformance Egypt Cairo, Egypt

Leveraged the opportunity to interact directly with American customers, enhancing my communication skills and English language fluency to effectively resolve their inquiries.
